

More Gain than Pain: Integrating a Complex Fixed-Income Market

May 6, 2020

Executive Summary:

The front-to-back electronification of the fixed-income market has created tremendous efficiency for everyone, from issuers to market makers to investors.

Markets are more transparent, liquidity is easier to tap, and trades are easier to analyze and process than ever before. And while recent market volatility strained fixed-income markets globally, higher levels of electronification as compared to the 2008 financial crisis have left market participants considerably more informed and markets open where they may have otherwise gone dark.

Case in point: The market for U.S. Treasuries saw over \$1 trillion dollars in bonds trade each day throughout the first week of March—a record.

Despite these benefits, what once required a phone, some broker relationships and a good operations staff now requires APIs, real-time data and front-to-back trade automation. This process evolution has also driven a transformation in the skills that trading desks are seeking out in new candidates, with data analysis and programming skills (Python, Jupyter, etc.) predicted to be the most important skill over the next 3-5 years, even ahead of relationship management and market knowledge.

The new way, of course, is the only viable path forward. Nonetheless, stitching together the technology quilt is a growing challenge for even the largest market participants.

Our suite of analytics and insights encompass all key performance metrics and drivers: market share, revenue performance, client relationship share and quality, operational excellence, return on equity, behavioral drivers, and industry evolution.

About CRISIL

CRISIL is a leading, agile and innovative global analytics company driven by its mission of making markets function better. It is majority owned by S&P Global Inc., a leading provider of transparent and independent ratings, benchmarks, analytics, and data to the capital and commodity markets worldwide.

CRISIL is India's foremost provider of ratings, data, research, analytics, and solutions with a strong record of growth, culture of innovation, and global footprint.

It has delivered independent opinions, actionable insights and efficient solutions to over 100,000 customers through businesses that operate from India, the U.S., the U.K., Argentina, Poland, China, Hong Kong, and Singapore.
