

# Sizing and Segmenting Trading in the U.S. Treasury Market

December 12, 2017

Executive Summary:

Close to a half trillion dollars in U.S. Treasury bonds trade every day, and Greenwich Associates estimates over two-thirds of this volume trades electronically.

Despite the market's size, few have a complete view of exactly who is doing the trading, what they're trading, where they're trading it, and exactly how those transactions are completed.

Considerable research has been done examining the various segments of this market. For instance, Greenwich Associates has, in recent years, examined the [interactions of institutional investors with traditional dealers](#), the [role of principal trading firms](#), and the [mechanics of the off-the-run market](#), among others. However, research quantitatively defining the entire market and each of its segments has so far been limited.

This relative lack of transparency was brought to the attention of policy and rule-makers following the flash rally of 2014. Transparency is at the center of the debate about public reporting requirements for U.S. Treasury trades and further oversight of market participants. Based on our interviews with over 100 North American investors in U.S. Treasuries, top dealers and non-bank liquidity providers, and each of the eight electronic platforms trading these bonds, this research melds Greenwich Associates primary research with public data to paint a clear and accurate picture of the full U.S. Treasury market, e-trading adoption, platform usage, and our expectations for change moving forward.

Methodology:

In the first quarter of 2017, Greenwich Associates interviewed 93 U.S.-based buy-side investors in U.S. government bonds, in order to learn more about their use of electronic trading and nonbank liquidity providers. In addition, Greenwich conducted interviews with 20 North American buy-side respondents as a part of the Greenwich Associates 2017 Off-the-Run U.S. Treasuries Study, investigating the ease of executing on- and off-the-run treasuries. Data included is based on these interviews, as well as Greenwich Associates estimates based on conversations with market participants, trading platforms and nonbank liquidity providers.

Coalition Greenwich, a division of CRISIL, an S&P Global Company, is a leading global provider of strategic benchmarking, analytics and insights to the financial services industry.

We specialize in providing unique, high-value and actionable information to help our clients improve their business performance.

Our suite of analytics and insights encompass all key performance metrics and drivers: market share, revenue performance, client relationship share and quality, operational excellence, return on equity, behavioral drivers, and industry evolution.

## About CRISIL

CRISIL is a leading, agile and innovative global analytics company driven by its mission of making markets function better. It is majority owned by S&P Global Inc., a leading provider of transparent and independent ratings, benchmarks, analytics, and data to the capital and commodity markets worldwide.

CRISIL is India's foremost provider of ratings, data, research, analytics, and solutions with a strong record of growth, culture of innovation, and global footprint.

It has delivered independent opinions, actionable insights and efficient solutions to over 100,000 customers through businesses that operate from India, the U.S., the U.K., Argentina, Poland, China, Hong Kong, and Singapore.

This Document may contain analysis of commercial data relating to revenues, productivity and headcount of financial services organisations (together with any other commercial information set out in the Document). The Document may also include statements, estimates and projections with respect to the anticipated future performance of certain companies and as to the market for those companies' products and services.

The Document does not constitute (or purport to constitute) an accurate or complete representation of past or future activities of the businesses or companies considered in it but rather is designed to only highlight the trends. This Document is not (and does not purport to be) a comprehensive Document on the financial state of any business or company. The Document represents the views of Crisil Coalition Greenwich as on the date of the Document and Crisil Coalition Greenwich has no obligation to update or change it in the light of new or additional information or changed circumstances after submission of the Document.

This Document is not (and does not purport to be) a credit assessment or investment advice and should not form basis of any lending, investment or credit decision. This Document does not constitute nor form part of an offer or invitation to subscribe for, underwrite or purchase securities in any company. Nor should this

Document, or any part of it, form the basis to be relied upon in any way in connection with any contract relating to any securities. The Document is not an investment analysis or research and is not subject to regulatory or legal obligations on the production of, or content of, investment analysis or research.

The data contained in the Document is based upon a particular bank's scope, which reflects a bank's data submission, business structure, and sales revenue Reporting methodology. As a result, any data contained in the Document may not be directly comparable to data presented to another bank. For franchise benchmarking, Crisil Coalition Greenwich has implemented equal ranking logic on aggregate results i.e., when sales revenues are within 5% of at least one competitor ahead, a tie is shown and designated by = (where actual ranks are shown). Entity level data has no equal ranking logic implemented and therefore, on occasion, the differences between rank bands can be very close mathematically.

The data in this Document may reflect the views reported to Crisil Coalition Greenwich by the research participants. Interviewees may be asked about their use of and demand for financial products and services and about investment practices in relevant financial markets. Crisil Coalition Greenwich compiles the data received, conducts statistical analysis and reviews for presentation purposes to produce the final results.
